

**EDUCATION & TRAINING
ONE DAY TRAINING
ANNOUNCEMENT**

“Small Plant Operation & Maintenance”

Presented by: The Education & Training Committee of the Eastern Pennsylvania
Water Pollution Control Operators Association, Inc.
David Kershner, Chair

Operators of small wastewater treatment plants do not have the luxury of specializing in one area of plant operations. They need to be familiar with all aspects of O&M. This course will provide attendees with an overview of practical knowledge and skills an operator in charge of a small WWTP needs to know. Attendees will also receive a small library of reference material on a CD. The operations portion of the course will focus on the activated sludge process.

At the end of this training program, attendees will be able to: know the most common reasons why a wastewater treatment plant fail; calculate critical information about their plant; perform simple tests to control and troubleshoot their process; describe the components of a typical maintenance program; and understand proper sampling and sample preservation. Students will perform critical calculations, such as detention time & F/M using plant data. Please bring a calculator and a pencil. If you want to use your own plant data, download the data collection form at www.cdcauthority.org/smallplant.doc

Date: Wednesday February 17, 2010 at Cabela's in Hamburg PA

Directions will be mailed with your registration verification!

**Registration begins at 8:00 AM (Coffee, Juice & Pastry available)
